

ReadingFish

for reading and listening comprehension

Comprehension can be improved. ReadingFish® is a highly effective reading and listening comprehension remediation program. This is the first program to integrate and sequentially apply three types of instructional practice identified by independent research as effective at improving reading comprehension. ReadingFish® includes:

- A highly structured 'visual imagery' program
- 'Cognitive skills training' designed to improve working memory, attention and visualization skills
- Instruction and practice using effective 'reading comprehension strategies'

It's all about comprehension in school.

Everyday, children struggle and fail in school due to reading problems, and all the additional hours of homework create tension at home. Teachers who insist a child will do better, "...if only he would pay attention," don't solve the problem, and having a student re-read a paragraph repeatedly in order to understand, doesn't deal with the underlying weakness.

Schools emphasize decoding when teaching reading skills but schools generally do not teach the underlying skills needed for effective reading comprehension. Without reading comprehension help, struggling learners do poorly on tests and don't gain the knowledge needed for success. No skill is more important to success than reading comprehension.

Reading comprehension can be improved.

Is it effective?

The ReadingFish® program for reading and listening comprehension has been successfully helping students for the past 6 years. On standardized tests, reading comprehension scores go up an average of 3 years in just 7 weeks.

ReadingFish® is effective because it has been developed and refined in a clinical setting. Years of experience involving multiple clinicians and a variety of students with a wide range of needs have helped shape ReadingFish into a highly effective program.

ReadingFish® is so effective that we guarantee two-years gain in 35 hours of instruction.

Tell Me About the Program.

ReadingFish® is designed to take between 30 and 50 sessions depending upon the needs of the student. It should be administered between 2 and 5 times per week. Each session is one hour long. The session is divided into different skill areas with the tasks changing about every ten minutes. ReadingFish® is easy to administer and fun for the student.

ReadingFish® is designed for students who are at or above the 4th grade reading level. The reading materials selected for instruction will be at the appropriate reading level for your student.

ReadingFish® includes pre and post-testing done online, with a real person. To ensure success, the pre-testing will be evaluated to make sure that the program is appropriate for your student. While you can buy the kit without the online testing, we recommend the testing to be confident that your child will succeed.

The ReadingFish Home Training Kit includes:

- Online, Pre and Post-Testing
- Detailed Manual of over 175 pages
- Training DVD, over 90 minutes
- 2 books of comprehension passages
- 30 Color Pictures for exercises
- 9 Questions Cards
- 4 Objects for initial descriptions
- 16 Colored Blocks for exercises
- 6 weeks of phone support
- All in a convenient storage case.
